

Susan Lambert

Has successfully completed the BMABA Martial Arts First Aid Essentials Award, having met the required standard following a formal assessment of the named person's core technical knowledge. This First Aid Essentials award covers the primary emergency care concerns of a casualty in the event of a medical emergency. It does not replace the need for face to face training but does provide a minimum standard of competency for a martial arts setting.

Valid for 2 years from April 18, 2025, 10:50 pm.

John Vincent

Learning Management Team

This does not provide confirmation of teaching entitlement, grade or any other technical competency. Essential vocational training is not a substitute for face to face training and it remains best-practice for every lead instructor to hold this level of accredited training.
